

At **Grand Velas Los Cabos**, we promote sustainability and social commitment through various innovative and responsible actions.

Ecological Practices

- **Beach Conservation**
We organize beach cleaning brigades every month involving over 30 staff members to help keep the beaches free from debris and litter.
- **Reducing Plastic Use**
We use 100% biodegradable products as an alternative to reduce plastic use.
- **Marine Turtle Conservation**
Various preservation measures are implemented to protect the turtles that nest on our beaches, as well as their nests.

Energy

- **Energy Generating Plants**
We reduce the consumption of non-renewable resources by implementing an energy plant and forming alliances with companies that produce solar and wind energy.
- **Efficient Laundry Processes**
Our laundry facilities include a water treatment plant that efficiently filters soapy water, saving 30% of the total used in the entire washing process.

Community

Social Impact

We are committed to generating employment in the communities where we operate. We maintain a ratio of 3 staff members per guest, compared to other hotels that employ one staff member for every 3 or 4 guests.

Our Guests

Awareness Campaigns

The Kids' Club and Teens' Club encourage the use of recyclable materials with crafts that give young guests an idea of how to reuse and follow recycling tips at home. Among the activities, there are ecological tours of the properties to learn more about the flora and fauna we have the privilege of hosting in our natural settings. Additionally, guests have a card in their suite to place on the bed when they wish to have their sheets and towels replaced.

CERTIFICATIONS

Blue Flag 2023

Grand Velas Los Cabos was recognized with this international distinction granted only to the beaches that meet and maintain strict environmental criteria, security and services, environmental education, and water quality.
